

WALLdesign-2™

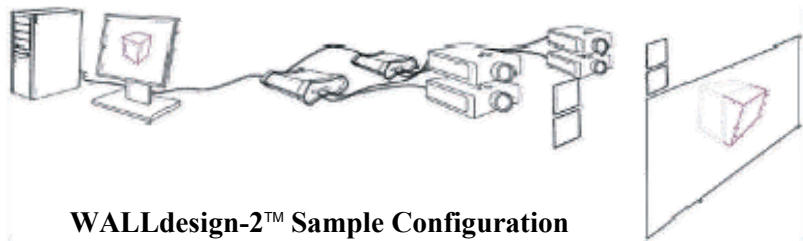

VIZCAN's **WALLdesign-2™** System is unique in the Visualization industry. Rather than a defined product with a fixed specification, **WALLdesign-2™** is a dual channel product design with specifications that can be customized to ***FIT YOUR NEEDS***.

VIZCAN's **WALLdesign-2™** is versatile. It can be used as a dual channel passive stereo fixed installation or as a portable Visualisation display and it is "plug and play" compatible to almost any operating system.

VIZCAN's **WALLdesign-2™** is high quality at an affordable price. All components of a **WALLdesign-2™** system are selected to represent the best-of-breed technologies. Many of VIZCAN's **WALLdesign-2™** designs incorporate non-traditional configurations running from non-traditional Image Generators in non-traditional roles.

Passive stereo stack
